

1. An airbag cushion comprising a coated inflatable fabric, wherein said inflatable fabric is at least partially coated with an elastomeric composition; wherein said airbag cushion exhibits a characteristic leak-down time after inflation of at least 5 seconds; and wherein said inflatable fabric comprises at least two layers of fabric in certain discrete areas of the fabric and at least one narrow single fabric layer at a discrete area within said fabric, wherein said at least one narrow single fabric layer is formed solely from a basket weave pattern of an even number of yarns, at most 12 yarns in width.
2. The airbag cushion of Claim 1 wherein said elastomeric composition is present on the surface of said inflatable fabric in an amount of at most 3.0 ounces per square yard of the fabric.
3. The fabric of Claim 1 wherein said at least two layers of fabric within said inflatable fabric are formed solely from one type of weave pattern, wherein said weave pattern is not a basket weave pattern.
3. The fabric of Claim 2 wherein the weave pattern of said at least two layers of fabric within said inflatable fabric is a plain weave pattern.

5. The fabric of Claim 1 wherein at least two discrete narrow areas of single fabric layers are present within said inflatable fabric, wherein said at least two single fabric layers are separated by an area of two layers of fabric, and wherein the lengths of each single layer is from 4 to 8 yarns in length.
6. The fabric of Claim 5 wherein said at least two single fabric layer areas are constructed solely from basket weave patterns containing at least two yarns per basket pattern and at most four yarns per basket pattern.
7. The fabric of Claim 6 wherein said separator two layers of fabric between said two single layers of fabric comprises an even number of weft yarns.
8. The fabric of Claim 7 wherein said separator two layers of fabric comprises at most 12 weft yarns and at least 2 weft yarns.
9. The fabric of Claim 8 wherein said at least two single fabric layers are constructed solely from two-by-two basket weave patterns and said separator double fabric layer comprises four weft yarns.
10. The airbag cushion of Claim 1 wherein said elastomeric composition comprises at least one elastomer exhibiting a tensile strength of at least 2,000 psi and an elongation at break of at least 180%.

- 00000000 "Sub A9" SET FID

18. The airbag cushion of Claim 2 wherein said elastomeric composition is coated on said inflatable fabric surface in an amount of at most 2.0 ounces per square yard.
19. The airbag cushion of Claim 18 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.5 ounces per square yard.
20. The airbag cushion of Claim 19 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.2 ounces per square yard.
21. The airbag cushion of Claim 21 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.0 ounces per square yard.
22. The airbag cushion of Claim 21 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 0.8 ounces per square yard.
23. An airbag cushion comprising a coated inflatable fabric, wherein said inflatable fabric is at least partially coated with an elastomeric composition; wherein said airbag cushion exhibits a characteristic leak-down time after inflation of at least 5 seconds; and wherein said inflatable fabric comprises at least two layers of fabric in certain discrete areas of the fabric and at least one single fabric layer at a discrete area within said fabric, wherein the weave diagram for such an

inflatable fabric does not exhibit more than three consecutive unfilled blocks in any row or column.

24. The airbag cushion of Claim 23 wherein said elastomeric composition is present on the surface of said inflatable fabric in an amount of at most 3.0 ounces per square yard of the fabric.

25. The airbag cushion of Claim 23 wherein wherein said elastomeric composition comprises at least one elastomer exhibiting a tensile strength of at least 2,000 psi and an elongation at break of at least 180%.

26. The airbag cushion of Claim 23 wherein said elastomeric composition comprises polyurethane.

27. The airbag cushion of Claim 23 wherein said coated fabric is woven from polyamide yarns.

28. The airbag cushion of Claim 27 wherein said polyamide yarns are formed from nylon 6,6 fiber.

29. The airbag cushion of Claim 27 wherein said polyamide yarns are multifilament yarns characterized by a linear density of about 210-630 denier.

Conf

30. ~~The airbag cushion of Claim 28, wherein wherein said multifilament yarns are~~
characterized by a filament linear density of about 4 denier per filament or less.

31. The airbag cushion of Claim 25, wherein said elastomeric composition is present in the form of a resin solution in an organic solvent.

32. The airbag cushion of Claim 26, wherein said elastomeric polyurethane composition is polycarbonate polyurethane.

33. The airbag cushion of Claim 24 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 2.0 ounces per square yard.

34. The airbag cushion of Claim 33 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.5 ounces per square yard.

35. The airbag cushion of Claim 34 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.2 ounces per square yard.

36. The airbag cushion of Claim 35 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.0 ounces per square yard.

41. The airbag cushion of Claim 38/wherein said elastomeric composition comprises polyurethane.

42. The airbag cushion of Claim 38 wherein said coated fabric is woven from polyamide yarns.
43. The airbag cushion of Claim 38 wherein said polyamide yarns are formed from nylon 6,6 fiber.
44. The airbag cushion of Claim 43, wherein said polyamide ~~yarns are multifilament yarns~~ characterized by a linear density of about 210-630 denier.
45. The airbag cushion of Claim 44, wherein wherein said multifilament yarns are characterized by a filament linear density of about 4 denier per filament or less.
46. The airbag cushion of Claim 40, wherein said elastomeric composition is present in the form of a resin solution in an organic solvent.
47. The airbag cushion of Claim 41, wherein said elastomeric polyurethane composition is polycarbonate polyurethane.
48. The airbag cushion of Claim 39 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 2.0 ounces per square yard.

Sub A11

50. The airbag cushion of Claim 49 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.2 ounces per square yard.

51. The airbag cushion of Claim 50 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 1.0 ounces per square yard.

52. The airbag cushion of Claim 51 wherein said elastomeric composition is coated on said airbag fabric surface in an amount of at most 0.8 ounces per square yard.

53. An airbag cushion comprising a coated inflatable fabric, wherein said inflatable fabric is at least partially coated with an elastomeric composition; wherein said airbag cushion exhibits a characteristic leak-down time after inflation of at least 5 seconds; and wherein said inflatable fabric comprises at least two layers of fabric in certain discrete areas of the fabric and at least one narrow single fabric layer at least two discrete areas within said fabric, wherein said at least one narrow single fabric layer is formed solely from a basket weave pattern of an even number of yarns, at most 12 yarns in width, wherein at least two discrete narrow areas of single fabric layers are present within said inflatable fabric, wherein said at least two areas of single fabric layers are

54. The airbag cushion of Claim 53 wherein said elastomeric composition is present on the surface of said inflatable fabric in an amount of at most 3.0 ounces per square yard of the fabric.

56. The airbag cushion of Claim 53 wherein said elastomeric composition comprises polyurethane.

58. The airbag cushion of Claim 57 wherein said polyamide yarns are formed from nylon 6,6 fiber.
